 \$1825pp- double

APRIL 7-15, 2027

Get ready to explore Jamestown, Williamsburg, Yorktown and our nation's capital! . . . with an emphasis on the "principles" and "providence" that established our country and its unique form of government. We'll give particular attention to the individuals used by God to accomplish His purposes. We'll stand in the very places where the ideas were first planted... where history turned . . . from battlefields to ballrooms. . . and see the evidence for Francis Scott Key's description of America as a "Heav'n rescued Land." We'll also explore the art and architecture of those places and take note of how both reflect the prevailing worldview. My hope is that students & parents finish the tour with enthusiasm for their own role in His-story and an understanding of their responsibility to apply truth in a way that impacts the culture today.
